Step-by-step Demonstration of Shopping List WebApp
By: Mona Elgendy

1-the User will fill the required two inputs (Product, and the quantities) to add to shopping list.

2- after press Add Button, and accepted user products with quantities – A bootstrap hover table will display the inserted record in shopping list along with remove buttons to remove corresponding products from the list. and the form is Cleared automatically

3- On clicking the remove button, an confirm delete message display delete confirmation then remove the specific product/quantity from shopping list.
